fabian Therapy evolution
Our 2-in-1 device
When It Comes to Life, There Is No Compromise

Distributing worldwide

ACUTRONIC is a privately held company that develops, manufactures, and distributes high-tech ventilation and monitoring solutions for neonatal, pediatric, and adult ICUs and intensive care transportation in over 90 countries. When it comes to the most critical areas of respiratory care, we are the leading partner for hospitals in neonatology, pediatrics, jet ventilation, and difficult airway management.

Forward thinking

It is our aspiration to develop innovative solutions that simplify the busy clinical routine for caregivers and increase patient safety. With over 30 years of experience our global network of clinical experts, we are quickly able to translate new developments into real innovations – and keep challenging ourselves to improve and set new benchmarks.

Exploring where others stop

ACUTRONIC products have an excellent reputation for precision, quality, and service in the industry. We strive every day to provide the best solutions for the most challenging groups of patients. We continue to explore where others stop.

ACUTRONIC – Ventilation Beyond Limits
Ease of Use
Putting the focus back on the baby: the fabian Therapy evolution is designed from a user’s point of view, minimizing the time needed to manage ventilator controls.

Developmental Care
Particularly silent, optimized handling of the baby, bonding, and kangaroo care. The fabian Therapy evolution is designed to fully support these concepts in a low-stress environment.

Modularity
Future-oriented: a wide choice of NIV modes for all your needs and compatible with most NIV interfaces today.

Mobility
Designed for mobility: thanks to its compact and intelligent size, the fabian Therapy evolution allows easy access to the baby at all times without even disturbing the bedside inside the NICU or PICU.

Patient Safety
Keeping babies safe and protected whenever they are ventilated is the starting point of all our thoughts – and that includes easy maintenance with only a few parts for disinfection and sterilization, reduced Work Of Breathing (iWOB) and much more.

Compatibility & Interface
The fabian Therapy evolution is equipped with several communication interfaces and settings modes. This flexible system is also compatible with all breathing circuits currently available on the market.

fabian Therapy evolution
Our 2-in-1 device
From delivery room to NICU: the fabian Therapy evolution offers the best respiratory treatment solutions – normally available from different devices – in a single device.
One-touch principle
All operation procedures are carried out using a direct, time-saving and easy-to-understand one-touch principle.

Graphics
See waveforms, numeric data, loops, ventilator status, and more. Clearly displayed and represented.

Ease of Use
A clear, bright touch-screen TFT with intuitive commands reduces human error and puts the focus back on the baby.

Modularity
A wide choice of NIV modes for all your needs and compatible with the most popular NIV interfaces available today.

Ventilation Beyond Limits
nCPAP and DuoPAP modes, for nasal and mask ventilation, with automatic leak compensation featuring two-level CPAP mode to improve CO₂ removal.

3-in-1
NIV plus High Flow Nasal Cannula (HFNC) available in one device for an easy and safe weaning program.
Patient Safety

On the receiving end of our ventilators are the tiniest and most fragile patients imaginable. Keeping them safe and protected whenever they are ventilated is our top priority. That's why our ventilators feature:

- Integrated lock function to prevent inadvertent settings changes.
- Easy maintenance with few parts for disinfection and sterilization without any risk of infection inside the ventilator.
- Innovative automatic leakage compensation: this makes it the most advanced non-invasive ventilator in the world today.
- Reduced error risk thanks to the self-training ACUTRONIC concept.
- Built-in backup battery pack for up to 3 hours of self-powered operation.

Developmental Care

Premature babies are fragile. One of their special needs is quiet time for normal growth and development. Respiratory devices are a potential source of high noise levels and have a major impact on the baby's development process. The best ones are hardly heard or seen - they just do their job.

Innovative automatic leakage compensation: this makes it the most advanced non-invasive ventilator in the world today.
Designed for Mobility

Medical technology should speed up and simplify the workflow of clinicians. Interfaces should be familiar and intuitive. They should be consistent across different workstations, thus reducing the potential for error. Data should be entered just once and be available across multiple platforms to support decision making.

Ultimately, innovations in ventilator design and clinical information management can improve both patient safety and outcomes, while supporting maximum flexibility.

Comprehensive device
Allowing easy access to the baby at all times. No disturbances at the bedside in NICU/PICU from device rehuddles.

Lightweight unit
Designed for safe, practical transportation with integrated electronic gas blender and built-in battery.

Compatibility & Interface

Service mode
Service mode with advanced diagnostics via USB port, standard Ethernet connection.

Flexible & scalable
The system is flexible and can be used with all conventional breathing circuits currently available on the market.

Communication interface
Digital interface with hospital information systems, download settings and monitoring data.
The New fabian Family

The new fabian generation by ACUTRONIC consists of three Gold Club members. Each one represents the benchmark in its class, either in non-invasive, conventional or sophisticated high frequency ventilation. They are configured for your specific needs and can be upgraded with further options.

fabian HFO
Our 4-in-1 device

This one device offers all options: advanced conventional and non-invasive therapy, High Frequency Oscillation (HFO) and oxygen therapy (HFNC) for neonatal and pediatric patients.

fabian +nCPAP evolution
Our 3-in-1 device

The fabian +nCPAP evolution is a therapy system encased in a small yet powerful device. Ideal for NICU, PICU and transport applications.

fabian Therapy evolution
Our 2-in-1 device

The fabian Therapy evolution is the smallest but not the least powerful fabian family member. A true, complete and highly advanced non-invasive ventilator featuring all classic and new NIV modes.

Finding your Device

Non-invasive, conventional or sophisticated high frequency ventilation. No matter which product you choose, you’re getting a device that features the latest technology and is ready to ventilate beyond limits.

Functionality
The fabian Therapy evolution is intended for premature infants, newborns as well as children weighing up to 30 kg.

Intended Use
› The fabian Therapy evolution is intended for “in-patient use” in hospitals, medically-used rooms and intra-hospital patient transport.
› The fabian Therapy evolution is an electronically, microprocessor controlled CPAP generator.
› The fabian Therapy evolution generates CPAP, with excess pressure based on the continuous-flow principle. (Time-cycled, pressure-volume-limited)
› Oxygen is metered by the integrated air/O₂ blender

Ventilation modes
› Non-Invasive Ventilation (NIV)
› nCPAP/dualCPAP with variable flow generators
› Hi/LoO₂ Therapy
› High and Low flow oxygen therapy optional

Enhancements
› NIV with leak compensation

Special procedures
› Manual inspiration/hold
› (Sustained Lung Inflation)
› O₂ flush

Dimension
› (W x H x D) 24 cm x 27 cm x 35 cm
› Approx. 10 kg HFO module
› Diagonal screen size 5.7’’
› TFT color touch-screen with LED backlight
› Keypad with 14 buttons

Input and output ports
› 1 USB port (for SW updates)
› 1 RS 232 (9 pin) port for PDMS/HIS
› 1 RJ 45 Ethernet port for PDMS/HIS
› 1 nurse call connector
› External trigger connector

Designed in Switzerland

The fabian Therapy evolution is the result of more than 30 years of experience in design, development and craftsmanship. Powerful components like a precise electronic gas blender and a cleverly reduced assembling concept with easily accessible parts make this device user-friendly.

Together with a customized service program, fabian helps to minimize the cost of ownership.
